- Member of Board of Directors and Secretary, TCI Network
- Visiting Lecturer, Faculty of Management, University of British Columbia - Okanagan Campus

PROFILE

I am Research Director at Orkestra-Basque Institute of Competitiveness and teaching faculty at the University of Deusto. My research interests are in policy-relevant analysis of territorial competitiveness and socio-economic development processes. Within this my work is focused especially on territorial strategy-making, governance, clusters, innovation and cluster policy, policy evaluation, and the roles that universities play in territorial development. I have published widely on these issues in peer-reviewed journals and academic books, and have played leading roles in several European research projects, particularly in the fields of clusters and smart specialization strategies. I am regularly invited as an expert speaker/advisor by institutions such as the European Commission and by national and regional governments, and I am a member of the Board of Directors of TCI Network.
