

Mari Jose Aranguren, advisor of the European Commission for the design of the program Horizon 2020

Mari Jose Aranguren
Academic Director Orkestra

Horizon 2020 will bring together all of the European Commission's financing programs for research and innovation under one single instrument. The experts who have been selected as advisors will propose objectives and priorities for science, technology and innovation.

The participation of Orkestra's Academic Director is an opportunity to place some of the challenges that the Basque Country faces in this field in the European agenda, such as the need to bridge the gap between knowledge and the market, taking into account the very important scientific and technological capabilities that have been developed in the region.

Running from 2014 to 2020, with a budget of just over €70 billion, the program's aim is to guarantee Europe's competitiveness in the international arena and is part of the drive to create new growth and jobs.
